

Ritmonio

Living a quality experience.

PR26rev0_ENG/09/15

If an accessory did not tell who we are it would be only a detail

Varallo, September the 23rd 2015

Ritmonio Accessories series has born, designed to emphasize the new finishings and to be combined with the more current tap lines recounting the same mood. A complete and versatile proposal to make Ritmonio even more protagonist in the bathroom.

The stainless steel components are made in four finishings: the **black chrome**, original and sophisticated, the **brushed black chrome**, sober and sought, the **polished steel**, precious and elegant and the **brushed stainless steel**, refined and minimal.

It's a **full range** of accessories for the basin area and the shower available in the **exposed** version, in ceramic and **wall mounted**. Easy to install, they are fixed without drilling the wall.
